EDUCATION & AWARDS

The University of British Columbia <i>Bachelor of Science in Computer Science (Expected Graduation: May 2027)</i>	Vancouver, BC, Canada
Euclid Mathematics Contest, University of Waterloo <i>Top 5% Internationally, Certificate of Distinction</i>	2021

WORK EXPERIENCE

Software Engineer Intern <i>TypeScript, AWS, Playwright, OpenAI</i> <i>Contello.ai</i>	Jan. 2025 – Present <i>Toronto, ON, Canada</i>
- Enabled multi-brand accounts; migrated legacy data with zero loss and added Playwright E2E + integration tests across Dockerized service stacks (Node + DB), keeping CI builds reliable. - Expanded publishing coverage with React admin dashboards and an async video pipeline; added engagement analytics and Canva export. - Hit 99.9% scheduled-post success by moving generation to OpenAI Responses API, tightening auth/session, and wiring scheduler alerts + email across AWS.	
Software Engineer Intern <i>Vue.js, JavaScript, Jenkins, Docker</i> <i>Faaz Consulting</i>	May – Aug. 2023 <i>Mclean, VA, USA</i>
- Improved UI responsiveness by 30% and added new features using Vue.js and JavaScript. - Automated deployment processes with Jenkins and Docker, reducing deployment times by 20%. - Enhanced legacy systems and delivered software updates under strict deadlines.	

RESEARCH EXPERIENCE

Software Developer & Team Lead <i>Unreal Engine, C++, Python</i> <i>UBC Emerging Media Lab</i>	Sept. – Dec. 2024 <i>Vancouver, BC, Canada</i>
- Led development of an AI-driven VR clinical simulation in Unreal (C++), collaborating with UBC's School of Nursing to train nurse practitioners. - Designed a novel multithreaded supervisory architecture (C++/Python) that monitors AI patient behavior and enforces clinical protocol adherence. - Evaluated system performance, achieving 40% latency reduction and 90% inference cost savings through pipeline optimizations.	

PROJECTS

SoloPilot — Client Ops Studio <i>Python, TypeScript/Next.js, AWS, LangChain</i>	Personal Project
- Designing a human in the loop workspace with LLM copilots that unifies intake, planning, proposals, coding, QA, and delivery. - Shipped an email intake console that triages threads, captures scope, and renders versioned proposal PDFs with inline annotations and a revision loop. - Improved intake quality: an evaluator summarizes drafts against a rubric, then a revisor agent produces a higher-scoring alternative.	
InsightUBC - Dataset Manager <i>React.js, Node.js, REST API</i>	Academic Project
- Developed a full-stack web application for managing and analyzing academic datasets with React and Chart.js. - Integrated Node.js REST APIs with caching; implemented Mocha and Chai backend tests covering edge cases.	
Backer <i>TypeScript/Next.js 14, AWS (DynamoDB, S3, SES), NextAuth</i>	Hack The Coast 2026
- Architected a multi-tenant platform on DynamoDB (10+ tables) with typed repository abstractions and transactional writes serving an investor feed, messaging, and investment subsystems. - Built NextAuth middleware with role-based route guards and a 12+ route API surface spanning auth, feed, investments, uploads, and messaging.	

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Java, Python, SQL, C/C++, Go, HTML/CSS
Platforms & Tools: Next.js/React, Node.js/Express, **Playwright, Redux**; AWS (Lambda, DynamoDB, S3, SQS, CloudWatch); Git, Docker, **Jenkins**, Jest, RDBMS
