EDUCATION & AWARDS

University of British Columbia

Vancouver, BC, Canada

Bachelor of Science in Computer Science (Expected Graduation: May 2027)

Euclid Mathematics Contest, University of Waterloo, Top 5% Internationally

2021

WORK EXPERIENCE

Shopify

Sept. 2026 – Present

Software Engineer Intern

Toronto, ON, Canada

- Diagnosed and fixed a **WhatsApp onboarding eligibility bug**, tracing a broken merchant journey to an incorrect recommendation; added regression tests and merged a targeted fix.
- Built a **Codex integration now used across several teams**, adding **9 reusable skills** and session hooks; validated installation and upgrade flows in a sandbox.
- Implemented a **reviewer-approved settings cleanup** removing **6,941 lines across 373 files**, preserving independent feature gates and save behavior; merge pending.

RBC Royal Bank | *Python, Trino, Apache Spark, SQL, Linux*

Jan. – Aug. 2026

Software Developer Co-op

Vancouver, BC, Canada

- Rebuilt a **Python/Trino** ledger pipeline after a Spark optimization proved unstable; handled **10 SQL compatibility differences** while preserving data contracts and a rollback path.
- Cut aggregate **Dev/QA runtime 86%** (261 to 36 minutes across five workloads), verified matching business data, and shipped the integration to production with the team.

Contello.ai | *React, TypeScript/Node.js, AWS, OpenAI*

Jan. – Dec. 2025

AI Systems & Full-Stack Engineering Intern

Toronto, ON, Canada

- Owned **end-to-end delivery** of React/Node.js scheduling, multi-brand management, and media publishing; operated AWS pipelines handling **thousands of jobs/day**.
- Integrated the **OpenAI Responses API** and brand-document embeddings for content generation with human review, output validation, and cost/latency tracking.
- Raised scheduled-post reliability to **99.9%** through retry/backoff, CloudWatch alerting, Playwright E2E/integration tests, and CI/CD release gates.

RESEARCH EXPERIENCE

UBC Emerging Media Lab | *Unreal Engine, C++, Python*

Sept. – Dec. 2024

Software Developer & Team Lead

Vancouver, BC, Canada

- Led a **CS × Nursing team** from requirements through delivery of an AI-driven VR clinical simulation.
- Built C++/Python supervision for concurrent AI patients and clinical protocol enforcement; optimized inference to cut **latency 40%** and **costs 90%**.

PROJECTS

Workbase | *React/Next.js, TypeScript, PostgreSQL, AWS Bedrock*

Personal Project

- **Solo-built** a full-stack platform that turns GitHub repositories into evidence-backed project knowledge and career content, with OAuth ingestion and **user-approved claims**.
- Built an LLM pipeline that rejects weakly supported claims, with source attribution, credential redaction, bounded output repair, and **regression evaluations**.

Backer | *Next.js/TypeScript, Python, DynamoDB, XGBoost*

Hack The Coast 2026

- Built a **startup discovery feed** with swipe/watch tracking and **11 DynamoDB tables** for feed and messaging.
- Trained an **XGBoost ranker** on six behavioral/similarity features to personalize startup discovery.

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, SQL, C/C++, Java, Scala

Full Stack: React/Next.js, Node.js, REST APIs, PostgreSQL, DynamoDB

AI/ML: OpenAI API, AWS Bedrock, embeddings, XGBoost, LLM evaluation

Tools: AWS, Trino, Apache Spark, Docker, Git, Playwright, Vitest, CI/CD
