EDUCATION & AWARDS

The University of British Columbia

Vancouver, BC, Canada

Bachelor of Science in Computer Science (Expected Graduation: May 2027)

Euclid Mathematics Contest, University of Waterloo, Top 5% Internationally

2021

WORK EXPERIENCE

Shopify

Sept. 2026 – Present

Software Engineer Intern

Toronto, ON, Canada

- Built a **Codex integration used across several teams**, handling plugin-cache isolation, session-end timeouts, and upgrades through a Nix-packaged CLI.
- Added **shell linting and Bats tests** for the integration and verified installation and upgrade paths in a sandbox; packaged 9 reusable agent skills.

RBC Royal Bank | *Python, Java/Scala, Airflow, Docker, Linux*

Jan. – Aug. 2026

Software Developer Co-op

Vancouver, BC, Canada

- Developed cloud-hosted **Python/Java** services processing 50M+ daily transactions on petabyte-scale **Delta Lake** with **CI**-gated releases and code reviews.
- Optimized **Spark** jobs to cut **test runtime 40%**; rolled back the change after production instability.
- Worked on multi-region services with fault tolerance, idempotent re-runs, and automated failover for high-reliability banking workloads across **distributed** infrastructure.

Contello.ai | *TypeScript/Node.js, AWS, Docker*

Jan. – Dec. 2025

Software Engineer Intern

Toronto, ON, Canada

- Built **Playwright** E2E and integration **test** frameworks across **Dockerized** service stacks (Node + DB), gating all releases through **CI/CD** pipelines and catching regressions pre-deploy.
- Owned end-to-end feature delivery: shipped scheduling, multi-brand management, and async video publishing backed by **distributed** pipelines on **AWS** (SQS/S3) at thousands/day scale.
- Raised service reliability to 99.9% via retry/backoff, **CloudWatch** monitoring/alerting, and hardened auth/session across **Docker**-containerized deployments.

RESEARCH EXPERIENCE

UBC Emerging Media Lab | *Unreal Engine, C++, Python*

Sept. – Dec. 2024

Software Developer & Team Lead

Vancouver, BC, Canada

- Led an AI-driven VR clinical simulation in Unreal/C++ with UBC Nursing to train nurse practitioners.
- Built **multithreaded C++/Python supervision** for AI patient behavior and clinical protocols; optimized the pipeline to cut **latency 40%** and **costs 90%**.

PROJECTS

Backer | *TypeScript/Next.js, AWS (DynamoDB, S3, SES), NextAuth*

Hack The Coast 2026

- Architected a multi-tenant platform on DynamoDB (10+ tables) with typed repository abstractions and transactional writes serving an investor feed, messaging, and investment subsystems.
- Built NextAuth middleware with role-based route guards and a 12+ route API surface spanning auth, feed, investments, uploads, and messaging.

Workbase | *TypeScript/Next.js, Prisma/PostgreSQL, Vitest*

Personal Project

- Built a full-stack platform with Prisma/**PostgreSQL** data layer, REST API routes, and GitHub OAuth service integration.
- Wrote **Vitest test** suites covering domain logic (status transitions, eligibility, deduplication) and structured LLM client (parsing, repair, validation).

TECHNICAL SKILLS

Languages: Python, Java, TypeScript/JavaScript, **SQL**, C/C++, Go, HTML/CSS

Infrastructure & Data: Apache Spark, Docker, AWS (Lambda, DynamoDB, S3, SQS, CloudWatch), PostgreSQL, Delta Lake, Airflow

Testing & DevOps: Playwright, Vitest, Jenkins, Jest, **CI/CD**, Git, REST APIs, Linux
