EDUCATION & AWARDS

The University of British Columbia Vancouver, BC, Canada
Bachelor of Science in Computer Science (Expected Graduation: May 2027)

Euclid Mathematics Contest, University of Waterloo 2021
Top 5% Internationally, Certificate of Distinction

WORK EXPERIENCE

Software Developer Co-op | *Apache Spark, Scala, Airflow, Kafka, Linux* Jan. 2026 – Present
RBC Royal Bank Vancouver, BC, Canada

- Engineered secure **Scala** pipelines orchestrated by **Airflow** DAGs to process **50M+ daily transactions** from **Delta Lake**, enforcing strict **RBAC/encryption** controls on **petabyte-scale sensitive** financial data.
- Optimized **Spark** jobs by refactoring **SQL** queries and tuning **AQE/cluster memory**, solving resource bottlenecks and reducing **latency** by **40%**.
- Developing **multi-region** data pipelines with built-in **fault tolerance**, **idempotent** re-runs, and automated **failover** for critical banking workloads.

Software Engineer Intern | *React/Next.js, JavaScript, Tailwind CSS, TypeScript* Jan. – Dec. 2025
Contello.ai Toronto, ON, Canada

- Led a major **UI redesign** using **React/Next.js** and **Tailwind CSS**, building a **reusable component library** that improved workflows, visual consistency, and frontend velocity.
- Built **responsive dashboards** with **JavaScript** and modern **CSS** to visualize real-time queue health, campaign analytics, and multi-brand scheduling across thousands of posts/day.
- Raised reliability to 99.9% by layering **Playwright E2E** tests in CI, ensuring frontend regressions are caught before deployment.

RESEARCH EXPERIENCE

Software Developer & Team Lead | *Unreal Engine, C++, Python* Sept. – Dec. 2024
UBC Emerging Media Lab Vancouver, BC, Canada

- Led development of an **AI-driven** VR clinical simulation in **Unreal (C++)**, collaborating with UBC's School of Nursing to train nurse practitioners.
- Designed interactive **UI** state machines mirroring clinician decision trees, with a novel **multithreaded supervisory architecture** enforcing clinical protocol adherence.
- Evaluated system performance, achieving **40%** latency reduction and **90%** inference cost savings through pipeline optimizations.

PROJECTS

Backer | *React 18, Next.js 14, TypeScript, CSS* **Hack The Coast 2026**

- Built a **TikTok-style startup feed** with swipe interactions, watch-milestone tracking, and animated like/commit actions in **React**.

- Designed **11 component domains** with a shared **UI library** of reusable cards, modals, and form controls.
- Implemented multi-step founder/investor **onboarding flows** with media uploads, live validation, and **responsive layouts** across breakpoints.

SoloPilot — Client Ops Studio | *Next.js, React, TypeScript, Tailwind CSS* **Personal Project**

- Building a **Next.js/React** web app with **Tailwind CSS** that unifies client intake, planning, proposals, and delivery in one polished workspace.
- Shipped an email intake console with real-time thread management, inline annotations, and versioned PDF previews—all rendered client-side with **JavaScript**.
- Implemented responsive layouts and **component-driven architecture** for consistent styling and fast iteration.

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, HTML/CSS, Python, Java, SQL, C/C++

Frontend: React/Next.js, Vue.js, Tailwind CSS, Chart.js, responsive design, component libraries, state management

Tools & Platforms: Node.js/Express, Playwright, Git, Docker, AWS (Amplify, S3, CloudWatch), REST APIs, CI/CD
