EDUCATION & AWARDS

University of British Columbia

Vancouver, BC, Canada

Bachelor of Science in Computer Science (Expected Graduation: May 2027)

Euclid Mathematics Contest, University of Waterloo, Top 5% Internationally

2021

WORK EXPERIENCE

Shopify

Sept. 2026 – Present

Software Engineer Intern

Toronto, ON, Canada

- Merged a **WhatsApp merchant-eligibility fix** with regression tests, addressing the root cause of a broken onboarding flow without changing shared eligibility logic.
- Built a **Codex integration adopted across several teams**, with reusable skills, session hooks, and sandbox-validated installation and upgrade paths.

RBC Royal Bank | Python, Trino, Apache Spark, SQL, Linux

Jan. – Aug. 2026

Software Developer Co-op

Vancouver, BC, Canada

- Rebuilt a **Python/Trino** ledger pipeline after rolling back an unstable Spark optimization; handled **10 SQL differences** while preserving data contracts and a legacy fallback.
- Cut aggregate Dev/QA runtime **86%** (261 to 36 minutes; 7.3× across five workloads), validated business-row parity, and shipped the integration to production with the team.

Contello.ai | TypeScript/Node.js, AWS, OpenAI, Playwright

Jan. – Dec. 2025

AI Systems & Full-Stack Engineering Intern

Toronto, ON, Canada

- Built TypeScript/Node.js services and React workflows on event-driven AWS pipelines (SQS, S3), processing **thousands of jobs/day** with ownership from API design through production monitoring.
- Integrated the **OpenAI Responses API** and embeddings into brand-aware workflows with human review, output validation, and cost/latency tracking.
- Raised scheduled-post reliability to **99.9%** through retry/backoff, CloudWatch alerting, Playwright E2E/integration tests, and CI/CD release gates.

RESEARCH EXPERIENCE

UBC Emerging Media Lab | Unreal Engine, C++, Python

Sept. – Dec. 2024

Software Developer & Team Lead

Vancouver, BC, Canada

- Led an interdisciplinary CS × Nursing team building an AI-driven VR clinical simulation in Unreal/C++, owning requirements, architecture, and delivery.
- Built a multithreaded C++/Python supervisor for concurrent AI actors and restructured its inference pipeline, cutting latency **40%** and inference costs **90%**.

PROJECTS

Workbase | Next.js/TypeScript, PostgreSQL, AWS Bedrock

Personal Project

- Solo-built a **repository intelligence platform** that ingests GitHub code via OAuth, maintains evidence-backed project knowledge, and generates career artifacts from user-approved claims.
- Generalized the LLM repository-knowledge pipeline across codebases with **immutable evidence provenance**, sensitive quarantine, bounded structured-output repair, and regression evals to **fail closed** on weak evidence.

Backer | TypeScript, Python, AWS DynamoDB, XGBoost

Hack The Coast 2026

- Modeled **11 DynamoDB tables** with typed repositories, batched reads, and transactional writes for founder/investor workflows.
- Engineered six behavioral/similarity features and trained an **XGBoost ranking model** on investor interaction events to personalize startup discovery.

TECHNICAL SKILLS

Languages: Python, Java, Scala, TypeScript/JavaScript, C/C++, SQL, Bash

AI/ML: XGBoost, NLP/embeddings, LLM evaluation; OpenAI API, AWS Bedrock

Platforms: React/Next.js, Node.js, REST APIs; Trino, Apache Spark, Airflow; AWS (DynamoDB, S3, SQS, CloudWatch); PostgreSQL, Docker, Git, Linux, CI/CD
