EDUCATION & AWARDS

University of British Columbia

Vancouver, BC, Canada

Bachelor of Science in Computer Science (Expected Graduation: May 2027)

Euclid Mathematics Contest, University of Waterloo, Top 5% Internationally

2021

WORK EXPERIENCE

Shopify

Sept. 2026 – Present

Software Engineer Intern

Toronto, ON, Canada

- Traced a broken merchant onboarding journey to incorrect WhatsApp recommendations; merged a **root-cause eligibility fix** with regression tests.
- Identified a gap in internal developer tooling and built a **Codex integration now used across several teams**, adding 9 reusable skills and session hooks.

RBC Royal Bank | *Apache Spark, Scala, Airflow, Kafka, Linux*

Jan. – Aug. 2026

Software Developer Co-op

Vancouver, BC, Canada

- Built secure Scala/Airflow pipelines processing **50M+ daily transactions** from Delta Lake, enforcing RBAC/encryption on petabyte-scale financial data.
- Optimized **Spark** jobs to cut **test runtime 40%**; rolled back the change after production instability.
- Worked on **multi-region data products** with fault tolerance, idempotent re-runs, and automated failover for critical banking workloads.

Contello.ai | *TypeScript/Node.js, AWS, Playwright, OpenAI*

Jan. – Dec. 2025

Software Engineer Intern

Toronto, ON, Canada

- Owned **end-to-end product delivery**: shipped scheduling UX, multi-brand management, video publishing, and Canva export backed by AWS async pipelines at thousands/day scale.
- Improved AI content prep by ingesting brand docs, caching embeddings, and injecting channel-specific context while enforcing API guardrails.
- Raised reliability to **99.9%** via OpenAI Responses API migration, Playwright E2E gates in CI/CD, hardened auth/session, and retry/backoff with CloudWatch alerting.

RESEARCH EXPERIENCE

UBC Emerging Media Lab | *Unreal Engine, C++, Python*

Sept. – Dec. 2024

Software Developer & Team Lead

Vancouver, BC, Canada

- Led an **AI-driven VR clinical simulation** in Unreal/C++ with UBC Nursing; designed multithreaded C++/Python supervision for real-time AI patient protocol enforcement.
- Profiled the inference pipeline and call graph, achieving **40%** latency reduction and **90%** cost savings through targeted optimizations.

PROJECTS

Backer | *TypeScript/Next.js, AWS (DynamoDB, S3, SES), NextAuth*

Hack The Coast 2026

- Built a **TikTok-style startup feed** with swipe interactions and watch tracking; architected a DynamoDB data layer (10+ tables) powering feed, messaging, and investment workflows.
- Trained an **XGBoost ranker** on **6 features** (stage affinity, text similarity, tags, engagement) from DynamoDB event streams.

SoloPilot | *Python, TypeScript/Next.js, AWS, LangChain*

Personal Project

- Shipped an end-to-end freelancer workspace (intake, planning, proposals, delivery) with Next.js/Python, AWS infrastructure, and CI gates.
- Built a user-facing email intake console that triages threads, captures scope, and renders versioned proposal PDFs via a vision model.
- Designed a Python **evaluator-revisor agent loop** with rubric-based benchmarking for measured quality gains.

SKILLS

Languages: Java, Python, Scala, TypeScript/JavaScript, SQL, C/C++

Platforms & Tools: Apache Spark, Airflow, Kafka, Delta Lake, AWS, Next.js/React, Node.js, PostgreSQL, Playwright, Docker, Git
