EDUCATION & AWARDS

University of British Columbia

Vancouver, BC, Canada

Bachelor of Science in Computer Science (Expected Graduation: May 2027)

Euclid Mathematics Contest, University of Waterloo

2021

Top 5% Internationally, Certificate of Distinction

EXPERIENCE

Software Developer Co-op | Apache Spark, SQL, Python, Linux

Jan. 2026 – Present

RBC Royal Bank

Vancouver, BC, Canada

- Optimized **Apache Spark** jobs by refactoring **SQL** queries and improving data partitioning strategies, reducing job execution time by **40%**.
- Building distributed **Spark** pipelines processing **10M+ daily transactions** across enterprise general ledgers.

Software Engineer Intern | TypeScript/Node.js, AWS, Playwright, OpenAI

Jan. – Dec. 2025

Contello.ai

Toronto, ON, Canada

- Engineered real-time **ETL** pipelines on **AWS (SQS/S3)** with TypeScript/Next.js + Node dashboards; owned design→deploy→diagnostics/**DevOps (CloudWatch)** at **thousands/day** scale.
- Accelerated content prep by ingesting brand docs with an **NLP** step, caching embeddings, and auto-injecting channel-specific context while enforcing **API guardrails**.
- Expanded coverage across major platforms with a **distributed async pipeline**; added stream-based analytics, audit logs, and resilient Canva export automation.
- Raised scheduler reliability to **99.9%** by moving generation to **OpenAI Responses API**, integrating **Playwright E2E** gates into **CI/CD**, hardening auth/session, and adding **retry/backoff** plus **CloudWatch alerting**.

Software Developer & Team Lead | Unreal Engine, C++, Python

Sept. – Dec. 2024

UBC Emerging Media Lab

Vancouver, BC, Canada

- Led an **AI-powered** VR platform in **Unreal (C++)** with interactive UI **state machines** for clinical scenarios.
- Increased stability with a **multithreaded supervisory layer (C++/Python)** that monitors the AI patient and auto-corrects off-protocol replies.
- Delivered a functional prototype in two weeks, securing project funding.
- Cut backend costs by **90%** via system optimizations, improving real-time performance by **40%**.

PROJECTS

SoloPilot | Python, TypeScript/Next.js, AWS, LangChain

Personal Project

- Building a client-to-codebase bridge for solo freelancers that unifies client intake, planning, proposals, and delivery in one workspace.
- Shipped an email intake console that triages threads, captures scope, and renders versioned proposal PDFs with freeform annotations via a **Vision Model** that captures and translates intent for precise edits.
- Built a **Python** evaluator→revisor **agent** loop with rubric-based **benchmarking** (score + revision), improving response quality via measured iterations.
- Exports approved proposals as structured **PRDs** optimized for AI IDEs (**Antigravity, Cursor, VS Code**); provider-agnostic **LLM** layer; **CI** gates; **AWS** ops (**Bedrock**, S3 versioning, CloudWatch).

Backer | TypeScript/Next.js, AWS DynamoDB, NextAuth

Hack The Coast 2026

- Trained an **XGBoost** **ranker** for a TikTok-style investor feed, scoring startups using **6 features** (stage affinity, text similarity, tag overlap, popularity) with **sigmoid scoring** and exploration noise.
- Built a **supervised training pipeline** ingesting like/commit positives and sampled negatives from **DynamoDB**, with online enrichment from impression and watch-milestone **event streams**.
- Implemented the **ML feature layer**: investor affinity contexts, token-level text matching, and popularity normalization.

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Java, Python, SQL, C/C++, Swift, HTML/CSS, React Native

Platforms & Tools: Next.js, Node.js/Express, Playwright; AWS (Amplify, Lambda, DynamoDB, S3, SQS, CloudWatch); OpenAI API; Meta/LinkedIn/X/Canva APIs; Git, Docker, Yarn, Tailwind CSS, RDBMS
