EDUCATION & AWARDS

The University of British Columbia <i>Bachelor of Science in Computer Science (Expected Graduation: May 2027)</i>	Vancouver, BC, Canada
Euclid Mathematics Contest, University of Waterloo <i>Top 5% Internationally, Certificate of Distinction</i>	2021

WORK EXPERIENCE

Software Developer Co-op <i>Apache Spark, Scala, Airflow, Kafka, Linux</i> <i>RBC Royal Bank</i>	Jan. 2026 – Present Vancouver, BC, Canada
- Engineered secure Scala pipelines orchestrated by Airflow DAGs to process 50M+ daily transactions from Delta Lake, enforcing strict RBAC/encryption controls on petabyte-scale sensitive financial data. - Optimized Spark jobs by refactoring SQL queries and tuning AQE/cluster memory, solving resource bottlenecks and reducing latency by 40%. - Developing multi-region data pipelines with built-in fault tolerance, idempotent re-runs, and automated failover for critical banking workloads.	
Software Engineer Intern <i>React/Next.js, JavaScript, Tailwind CSS, TypeScript</i> <i>Contello.ai</i>	Jan. – Dec. 2025 Toronto, ON, Canada
- Led a major UI redesign using React/Next.js and Tailwind CSS, building a reusable component library that improved workflows, visual consistency, and frontend velocity. - Built responsive dashboards with JavaScript and modern CSS to visualize real-time queue health, campaign analytics, and multi-brand scheduling across thousands of posts/day. - Raised reliability to 99.9% by layering Playwright E2E tests in CI, ensuring frontend regressions are caught before deployment.	

RESEARCH EXPERIENCE

Software Developer & Team Lead <i>Unreal Engine, C++, Python</i> <i>UBC Emerging Media Lab</i>	Sept. – Dec. 2024 Vancouver, BC, Canada
- Led development of an AI-driven VR clinical simulation in Unreal (C++), collaborating with UBC's School of Nursing to train nurse practitioners. - Designed interactive UI state machines mirroring clinician decision trees, with a novel multithreaded supervisory architecture enforcing clinical protocol adherence. - Evaluated system performance, achieving 40% latency reduction and 90% inference cost savings through pipeline optimizations.	

PROJECTS

Backer <i>React 18, Next.js 14, TypeScript, CSS</i>	Hack The Coast 2026
- Built a TikTok-style startup feed with swipe interactions, watch-milestone tracking, and animated like/commit actions in React. - Designed 11 component domains with a shared UI library of reusable cards, modals, and form controls. - Implemented multi-step founder/investor onboarding flows with media uploads, live validation, and responsive layouts across breakpoints.	
SoloPilot — Client Ops Studio <i>Next.js, React, TypeScript, Tailwind CSS</i>	Personal Project
- Building a Next.js/React web app with Tailwind CSS that unifies client intake, planning, proposals, and delivery in one polished workspace. - Shipped an email intake console with real-time thread management, inline annotations, and versioned PDF previews—all rendered client-side with JavaScript. - Implemented responsive layouts and component-driven architecture for consistent styling and fast iteration.	

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, HTML/CSS, Python, Java, SQL, C/C++
Frontend: React/Next.js, Vue.js, Tailwind CSS, Chart.js, responsive design, component libraries, state management
Tools & Platforms: Node.js/Express, Playwright, Git, Docker, AWS (Amplify, S3, CloudWatch), REST APIs, CI/CD
